

LFTS - Pagination

44. Laughably Simple Pagination

En este capitulo le agregamos paginacion a nuestro sitio

```

    @include('posts._header')

    <main class="max-w-6xl mx-auto mt-6 lg:mt-20 space-y-6">
        @if ($posts->count())
            <x-posts-grid :posts="$posts" />
            {{$posts->links()}}
        @else
            <p class="text-center">No posts yet. Please check back later.</p>
        @endif
    </main>
</x-layout>

```

```

5 | use Illuminate\Pagination\Paginator;
6 | use Illuminate\Support\ServiceProvider;
7 |
8 | class AppServiceProvider extends ServiceProvider
9 | {
10 |     /**
11 |      * Register any application services.
12 |      *
13 |      * @return void
14 |      */
15 |     public function register()
16 |     {
17 |         //
18 |     }
19 |
20 |     /**
21 |      * Bootstrap any application services.
22 |      *
23 |      * @return void
24 |      */
25 |     public function boot()
26 |     {
27 |         Paginator::useTailwind();
28 |     }
29 | }

```

```

10 | {
11 |     public function index()
12 |     {
13 |
14 |         return view('posts.index', [
15 |             'posts' => Post::latest()->filter(request(['search', 'category', 'author']))->paginate(10)->withQueryString(),
16 |         ]);
17 |     }
18 | }

```

```
<x-dropdown-item
href="/?{{http_build_query(request()->except('category', 'page'))}}"
class="{{request()->routeIs('home') && !request('category') ? 'bg-blue-500 text-white' : ''}}">All Categories

@foreach ($categories as $category)
    <x-dropdown-item
        href="/?category={{$category->slug}}&{{http_build_query(request()->except('category', 'page'))}}"
        class="{{isset($currentCategory) && $currentCategory->id === $category->id ? 'bg-blue-500 text-white' : ''}}
        {{ucwords($category->name)}}
    </x-dropdown-item>
@endforeach
</x-dropdown>
```

Tambien agregamos los diferente paginaciones que trae laravel por defecto

```
php artisan vendor publish
```

ese comando nos va a desplegar una lista de cosas que podemos publicar, en este caso nos interesa "laravel-pagination" que es la 17, entonces lo que tenemos que hacer es escribir el numero del tag que queremos publicar
